

ANZAC Alliance: Maintenance, upgrade and modification to Frigate fleet (2005)

Tenix has expanded into the project offices at the CUF with the RAN as part of the ANZAC Alliance contract to upgrade weapons systems aboard the RAN's ANZAC Frigate fleet.

The ANZAC Alliance - Tenix, Saab Systems and the Commonwealth Defence Materials Organisation - won the \$500m contract in 2004. An estimated \$150m in work will be carried out in WA.

HMAS *Arunta* and HMAS *Anzac* were the first of the Frigates to berth at the CUF's 3,000 tonne eastern loadout wharf as part of the project.
