## Ferguson Seacabs: Service and supply base for Australasia

International offshore container specialists Ferguson Seacabs have selected the CUF as their service and supply base for Australasia. The CUF facilities will allow the company to offer a complete service including maintenance, testing, inspection and online asset tracking for their high stress shipping containers.

With headquarters in Aberdeen Scotland, Ferguson established an office in Perth in February 2007. Ferguson are the only dedicated provider of highly specialised and certified offshore equipment in Australia and will use the CUF facilities to supply a complete range of units to service the Australasian oil and gas industry.

The CUF facilities provides Ferguson with an ideal base from which to store, test and service their containers, proximity to port facilities for transport and delivery and interaction with oil and gas industry activities. Early Ferguson clients include FMC Technologies and Woodside.
