

Nomad Consolidated: Demountable assembly and storage

Due to the increase in orders generated by WA's resource boom, Nomad Consolidated - builders of demountable living quarters and offices for remote mine sites - has spread its wings over the CUF's laydown area.

Nomad has outgrown its manufacturing facility within the AMC's Fabrication Precinct and has utilised the CUF to assemble and store over 100 demountables. Nomad, who is currently building on average 200 floors a month, is delivering product to nine sites throughout the State including Hope Downs, Mt Keith and Ravensthorpe.
