

## Ferguson Seacabs

International offshore container specialist Ferguson Seacabs continues to grow and expand its international operations at the AMC-CUF.

With its headquarters based in Aberdeen Scotland, the AMC-CUF provides Ferguson Seacabs with essential facilities to supply a complete range of units to service the Australasian oil and gas industry.

Ferguson Seacabs is the only dedicated provider of highly specialised and certified offshore equipment in Australia and offers a number of services to the oil and gas industry including maintenance, testing, inspection and online asset tracking.

The AMC-CUF is an ideal base for Ferguson Seacabs to store, test and service its containers given its proximity to sea transport and delivery and enables interaction with industry.

Ferguson Seacabs has provided services for FMC Technologies, Woodside and other major players in the oil and gas sector.
