# Georgiou Group: Transfer and Lay-by Wharf

The floating dock lay-by wharf and vessel transfer load-out wharf contract was awarded to Western Australia's Georgiou Group mid 2008.

Work is set for completion in April 2009 to meet the floating dock commissioning and trial programmes.

The new wharf is part of the \$174million infrastructure upgrade at the AMC-CUF and will enable the transfer of submarines into the ASC West maintenance facility and the docking of surface warships and commercial vessels for repair and maintenance by any suitably qualified company.

Georgiou Group has undertaken extensive ground bearing load tests as part of the transfer path re-profiling process to meet heavy load requirements.
