Hanseatic Marine: Construction of a series of SOLAS vessels

AMC tenant and premier superyacht builder Hanseatic Marine has a long-term lease agreement in the AMC-CUF's Building 9 fabrication hall to continue building a series of over 70metres SOLAS top-end luxury superyachts.

In 2007 Hanseatic Marine launched the 74metre superyacht Silver, the world's longest aluminum hulled private motor yacht.

After two years constructing Silver at the AMC-CUF, Hanseatic Marine is now building its sister vessel which will be equally as luxurious and built with the expert workforce established in Henderson Western Australia.
