

Nomad Consolidated

Nomad Consolidated, builders of demountable living quarters and offices for remote mine sites, is continuing to utilise the AMC-CUF's lay-down capacity.

Having outgrown its manufacturing facility within the AMC's Fabrication Precinct, Nomad is using the AMC-CUF lay-down area to construct accommodation units for the Woodside Pluto Gap Ridge Project and for BHP Billion's Rapid Growth Project Phase Five in the State's North-West.

In 2008 Nomad delivered products to more than nine sites throughout the State including Hope Downs, Mount Keith and Ravensthorpe.
