

# Self-Propelled Modular Transport System

The Self-Propelled Modular Transport (SPMT) system was delivered to the AMC-CUF in April 2009 and it will be commissioned following an extensive trials programme linked with the floating dock and transfer system infrastructure.

The AMC-CUF will have 24 SPMT units permanently located at the AMC-CUF to transport heavy loads of up to 4500 tonnes. The SPMTs are available for use by any project undertaken at the AMC-CUF.

The facility manager and transport operator will be able to allocate the user's requirements into the schedule of availability.
