Strategic Marine: Ship maintenance at AMC's eastern wharf

Strategic Marine used the Eastern Wharf at the AMC-CUF to undertake significant works on the 80 metre seismic vessel *Ocean Endeavour*.

Maintenance and modification works by the shipbuilder included fitting large containers to the forward deck, re-installation of a deck crane and adjustments to the ship's hydraulic and electrical systems.

The vessel left the CUF in mid-January 08 and is back on station in the Karratha-Dampier region in the North West of the State.
